

MODEL AWS

AERWAY STRAIGHT FRAME MODELS

AerWay®

FRAME: Four width configurations are available: 10', 12.5', 15' and 20'. The frame of the AerWay is a structural steel weldment with integral weight trays. The frame has Category III front brackets and integral rear brackets for the attachment of an optional AerWay Pull Type Wheel Kit. Additional Hard Points on the frame allow for a number of attachments to be readily attached to the AerWay.

ROLLERS: The heavy duty rollers use 4 tines per row at 7.5" tine spacing. Each roller shaft is mounted with two C-Flex Springs and supported by 50mm (2") no lube trunnion mounted bearings. The rollers are equipped with either Shattertines or Leaf Tines. All units use Outboard Stars to give uniform tine spacing across the working width of the machine.

QUICK ADJUST: Swing arms can be adjusted in 2.5° degree increments, from 0° to 10°, to vary the degree of cultivation or aeration.

The AerWay AWS Straight Frame machine has been developed to satisfy the demands of farmers working smaller to moderate acreages. AerWays Quick Adjust swing arms allow the user to choose the degree of compaction relief, cultivation, aeration, and/or residue incorporation.
