

CROP CHOICE®

Boron 10%

A SPECIALTY MICRONUTRIENT

Crop Choice Boron 10% is a water soluble form of boron that is stable in 100% orthophosphate fertilizers. The addition of up to 5% by volume generally will not degrade the crystallization or long-term stability of the fertilizer.

DIRECTIONS FOR USE

Foliar application: This product may be used throughout the growing season at the rate of 1–2 pints per acre with a minimum of 20 gallons of water.

Row or band application: Apply 1/2–2 pints per acre just before planting.

Broadcast application: Apply 2–4 quarts per acre just before planting and work into the top 3"–5" of soil.

CONDITIONS OF SALE

Recommendations for use of this product are believed to be accurate. As with all products, weather, timing, crop conditions, location, and many other factors are beyond the control of SOIL Service, Inc., and no written or implied warranty is given for product performance.

MIXING DIRECTIONS

Pesticides: Follow this sequence.

1. Water
2. Pesticide
3. Boron 10%

Agitate to ensure proper mixing. Always conduct a jar test with new combinations.

Fertilizer: Inject or agitate to ensure mixing is thorough.

WARNING

Some crops may be injured by application of boron.

KEEP OUT OF REACH OF CHILDREN
